WELCOME

Creative Resins is a family run business for more than 30 years. We manufacture specialist paints and resins for Doors, Windows, Glass, Metals, Wood and Concrete as well as a comprehensive range of decorative resins including Water Clear Casting Resins and Chrome and Mirror paints. Our products are supplied to the construction industry worldwide as well as trade and general public. We work hand in hand with Composite Door manufacturers, Window fabricators, Glass Processing companies, Metal fabricators, Garage Door manufacturers, Kitchen and Flooring companies to provide not just a comprehensive range of industrial surface coatings but also solutions for their decorative, industrial and commercial requirements including the development, manufacture and supply of specialist application systems and equipment including bespoke software programmes and an unrivalled technical support.

OUTLINE RESINS

The unique Creative Resins formulations include high build outlines designed for use in both internal and external locations.

Outline Base and Hardener are both available in our solvent and waterbased systems. Both systems are covered by a comprehensive 10 year internal & external warranty supported by decades of worldwide customer installations, independent QUV and weathering testing. Outline Resins are extremely fast drying and available in an extensive range of colours and finishes.

SPECIFICALLY DESIGNED TO IMITATE TRADITIONAL LEAD AND FILM DESIGNS ON GLASS. OUR RESINS ARE AVAILABLE IN A WIDE RANGE OF COLOURS AND FINISHES ACHIEVING STUNNING RESULTS EVERY TIME.

OUTLINE BASE

Available in solvent or waterbased in a range of colours and finishes. Mix at 1:1 ratio. 10 year internal and external warranty and guaranteed not to scratch, fade or delaminate.

INFILL PIGMENTS

Infill pigments are available in 10 standard transparent colours and 3 metallics which are all intermixable enabling you to make an infinite array of shades, finishes and effects. They offer an opportunity to alter areas of clear transparent glass into textured, pastel and coloured areas giving traditional and realistic finishes, adding a new dimension to resin stained glass technology.
