

## Description

A range of coloured antique solutions to create antique effect on toughened glass. Black, Gold or Copper colours to use with our Antique Reactor to create unique patterns on any glass.

## Recommended Substrates

Any type of glass including toughened.

## Features and Benefits

Excellent Adhesion to Glass | Fast Drying | Unique Designs on glass

## Mixing and Application

1. Clean the glass thoroughly with CR Glass Cleaner.
2. Heat glass in heated booth or with heat gun.
3. Shake Antique Solution and spray on to glass using a trigger spray bottle to any desired pattern.
4. Spray Antique Reactor using a trigger bottle over the Antique Solution and leave to dry.
5. At this point an air gun can be used to create ring patterns on the glass, or it can be left as it dries.
6. Apply Mirror 1K directly from the tin using high pressure (approx. 3bar) and low volume.
7. After 1 hour, spray backing / protective coat of GlassPaints A and B, grey or black in colour.
8. Allow to fully cure over night before installation.

## Chemical Properties

Waterbased VOC Free

Colour: Gold, Copper or Black

Shelf Life: 1 year (air tight)

Touch dry at 20°C: 30 to 40 minutes

Recoat with Mirror 1K: 1 hour

Recoat with GlassPaint Backing: 1 hour

Unit 17C, Upper Field Road, Sittingbourne, Kent, ME10 3UP UK
