WELCOME

Creative Resins is a family run business for more than 30 years. We manufacture specialist paints and resins for Doors, Windows, Glass, Metals, Wood and Concrete as well as a comprehensive range of decorative resins including Water Clear Casting Resins and Chrome and Mirror paints. Our products are supplied to the construction industry worldwide as well as trade and general public.

We work hand in hand with Composite Door manufacturers, Window fabricators, Glass Processing companies, Metal fabricators, Garage Door manufacturers, Kitchen and Flooring companies to provide not just a comprehensive range of industrial surface coatings but also solutions for their decorative, industrial and commercial requirements including the development, manufacture and supply of specialist application systems and equipment including bespoke software programmes and an unrivalled technical support.

CRYSTALITE RESIN

PRODUCT DESCRIPTION

Crystalite is a unique transparent polyester and acrylic resin that allows simple, fast and economic reproduction of any bevelled, lead or fused glass panel - no matter how complicated the design. Crystalite can be used in an external location encapsulated within a sealed unit.

Laminating & Casting Resins

BEVELS

The revolutionary poly-acrylic formulation gives excellent resistance against weathering and UV light as well as a permanent bond to all types of glass. Individual bevels can be easily coloured giving unique results.

PRODUCTION

A complete range of exclusive designs for Composite Doors is available for in house production. As with all Creative Resin products a comprehensive 10 year warranty applies.

PROCESS

The Crystalite Resin is injected into a rigid mould that is constructed of fibreglass with a unique release gel coat surface via a 2 component pump system specifically developed by Creative Resins. These special moulds take only a few moments to be injected and the resin bevels are ready within as little as 45 minutes offering a very fast and economical production.

LAMINATING RESIN

Laminating Resin is a crystal clear transparent resin especially designed to remain water clear even when catalysed. Used for the lamination of glass sheets to create decorative glass and safety glass.

PROPERTIES

It is not prone to “yellowing” as in most other Polyester materials of a similar nature. Once Creative-Lam is fully cured it allows expansion of 300/350% with minimal shrinkage and exceptional toughness.

TRANSPARENT COLOURS

A full range of beautiful transparent colours that can all be intermixed to create any shade or effect. All the colours are prepared in our own facilities using the highest quality organic pigments providing long term UV stability.

This superior laminating resin also contains a specially adapted adhesion promoter that remains dormant until the addition of the catalyst. Laminating resin is extremely easy to use allowing easy flow and fast air bubble release.

CLEAR CAST 50

PRODUCT DESCRIPTION

A two component clear casting epoxy resin, very low viscosity, long pot life and Water Clear transparency. Can cast up to 50mm thick in a single application. Excellent degassing properties even at maximum thickness, excellent impact, non-yellowing, scratch resistance and can be machined and polished.

SUBSTRATE

Excellent adhesion to most substrates especially glass and metals and can be used to create worktops and table tops. Especially good for producing 'River Resin' tables where full transparency is required.

DECORATIVE

A wide range of colours and decorative effect fillers can be added to create limitless decorative finishes and objects.

JEWELLERY

Can be used for table tops and other decorative castings such as costume jewellery. A wide range of colours and decorative effect fillers can be added to create limitless decorative objects.

RAINDROP 3D EFFECT

Specially formulated to give excellent adhesion to glass and can be used to create 3D raindrop and tear drop effects on glass and mirrors. Chrome and other colours can be added to create a range of special effects.

CLEAR CAST 20

PRODUCT DESCRIPTION

A two component clear casting epoxy resin, medium viscosity, good pot life and very transparent. Can cast up to 20mm thick in a single application. Good degassing properties. It also benefits from being lightweight with minimal shrinkage and is non-yellowing. Can be machined and polished to a glass like finish perfect for decorative table tops.

INDUSTRY EXPERTS

We have an enviable reputation extending more than 30 years for supplying quality products and services worldwide to the decorative glass and surface coatings industry.

Fast Delivery

With large volumes of stock we aim to provide fast and efficient delivery for all your coating requirements.

Support 24/7

We aim to provide 24 hour technical support with our own experienced and highly trained staff and our range of online video tutorials.

100% Satisfaction

Your satisfaction is our satisfaction. Our reputation has been built on quality and service.

Online Ordering

Use our on line shop to simply place your orders at the click of a button.

Great Value

All our products are manufactured to an exceptional quality at a competitive price.

Trade Account

Get in touch with our accounts team to set up a trade credit account with payment plan.
